

DRAFT RESOLUTION 1.3

Draft Resolution

Committee: World Health Organization (WHO)

Topic: Making Medicines Affordable to All

Sponsors: Republic of Zimbabwe, Kingdom of Bahrain

Signatories: Armenia, Azerbaijan, Yemen, Somalia, Peru

1. Recalling Article 25 of the Universal Declaration of Human Rights, which asserts the right of every individual to a standard of living adequate for health and well-being, including access to medical care,

2. Acknowledging Target 3.8 of the Sustainable Development Goals, which calls for universal health coverage, including access to affordable, safe, effective, and quality essential medicines and vaccines for all,

3. Recognizing the importance of the WHO Model List of Essential Medicines as a guide for national medicine policies and procurement strategies to ensure equitable access,

4. Alarmed by the high cost of life-saving medicines, which limits access for millions, particularly in low-income and vulnerable populations,

1. Urges all Member States to implement national policies that prioritize the affordability and availability of essential medicines, especially for marginalized and underserved populations;

2. Encourages governments to utilize the flexibilities provided under the TRIPS Agreement, such as compulsory licensing and parallel importing, to improve access to affordable generic medicines;

3. Recommends the development of regional and national pharmaceutical manufacturing capabilities through investments, technical assistance, and international cooperation, particularly in low- and middle-income countries;

4. Calls upon pharmaceutical companies to improve transparency in drug pricing, including disclosing research and development costs, production costs, and markups;

5. Supports the establishment or strengthening of pooled procurement mechanisms at regional or international levels to negotiate lower prices and increase the efficiency of medicine distribution;

6. Requests Member States to collaborate with WHO and relevant organizations in developing equitable pricing strategies, differential pricing models, and tiered pricing systems to improve access to medicines;

7. Encourages increased funding from international donors, development banks, and philanthropic foundations to support access-to-medicine programs in countries with limited healthcare budgets;

8. Invites WHO to continue its work in assisting Member States with the review and implementation of national essential medicine lists and price monitoring systems;

9. Calls for enhanced investment in research and development of medicines for neglected tropical diseases and other conditions that primarily affect low-income populations;

10.**Recommends** that WHO convene an annual high-level meeting to review global progress on medicine affordability, share best practices, and identify challenges and innovations;
